

Are you ready for broadband funding awards?

Sitetracker Fiber Deployment Funding Guide

The U.S. government's BEAD program provides crucial funding to boost broadband in underserved communities, bridging the digital gap and promoting economic growth.

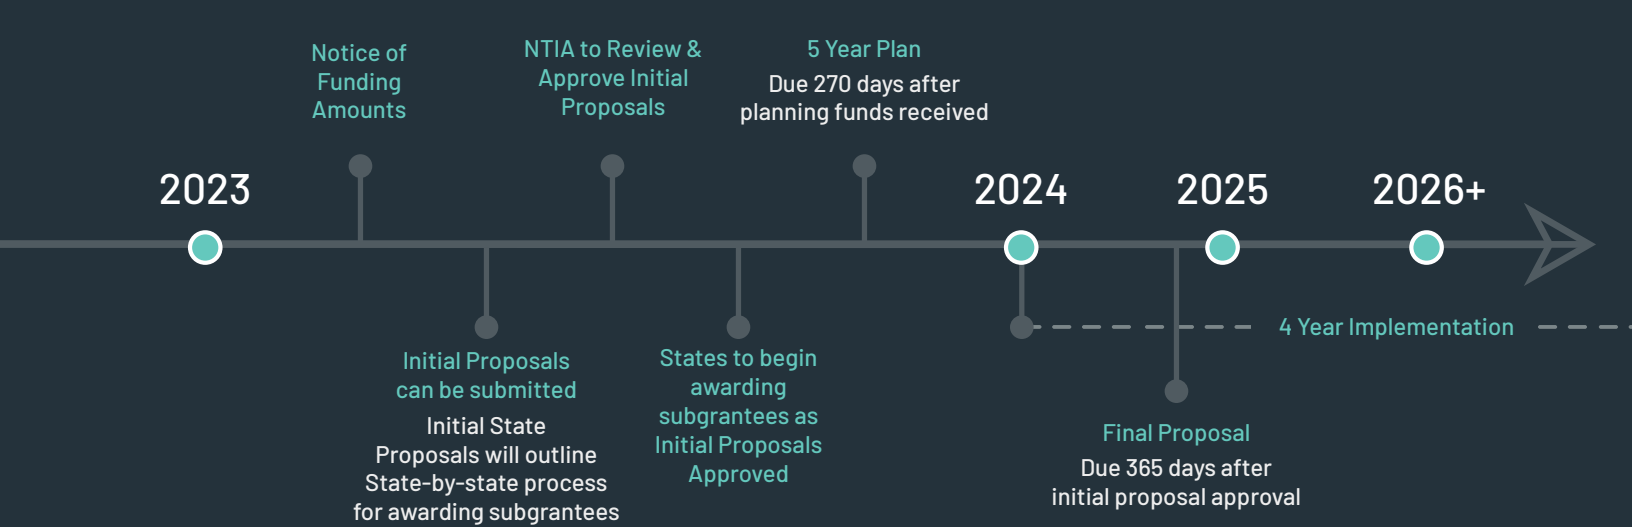

> **\$42.45B** <
being distributed

Will you have the adequate controls in place to effectively allocate funding and maximize its impact?

Leveraging Sitetracker, fiber operators can manage capital requests, grant expenditures, and speedily set up and execute against programs and projects to *deploy fiber quicker, cheaper, and more efficiently.*

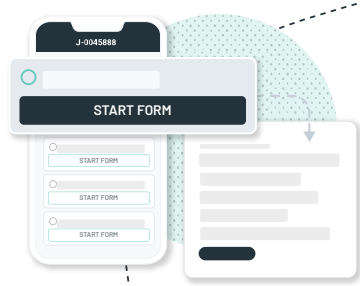

BEAD Program Estimated Timeline

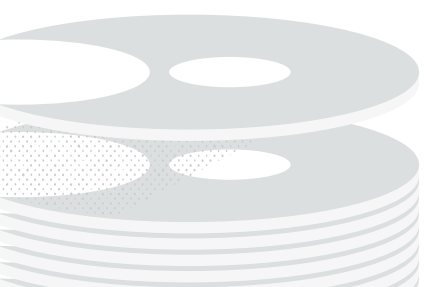

Congrats you've received your grant money!
It's time to create a fund in Sitetracker.

Allocate capital to deployment programs
to provide traceability and control.

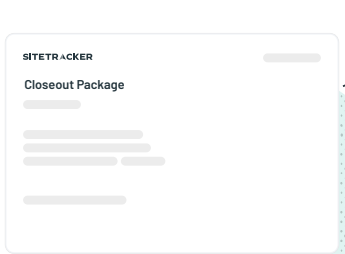

Manage all the documents and forms
for each funding request along with the status.

Operators can select geographic areas
for their deployments and then bid out the work.

Select and award the winning vendor
to do the work using bids and project finances in Sitetracker.

With Sitetracker, you can manage files, activities, and more
related to pre-construction & permits. Tie billing to milestones, forecast, dispatch jobs, and track production, & materials.

Easily create closeout packages and trigger invoices
from milestones by integrating with your billing system.

PROJECTS COMPLETED 50% FASTER

REDUCED MISSED FORECASTS BY 40%

With Sitetracker, PMs at Firstlight Fiber can now track projects easily, link the project with the data they need and forecast how much each project is worth.

Using Sitetracker, fiber operators can streamline the management of BEAD funds, ensuring efficient allocation and spending tied to specific projects. This maximizes the impact of BEAD funding and results in faster broadband deployment to underserved communities.
