

Solar Project Management Strategies

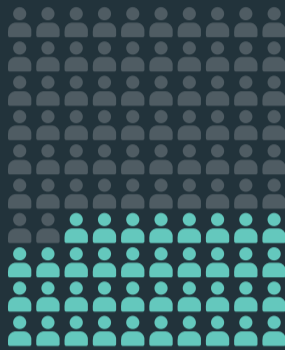

Over three months, we surveyed **several solar executives** about how they're managing projects and their plans for growth.

Almost **30%**

of executives want their software to support their ability to scale for future growth

But only **38%**

are somewhat confident in their current project management tools

How can solar leaders ensure project success and growth?

FOCUS AREAS

49%

Faster time to project completion

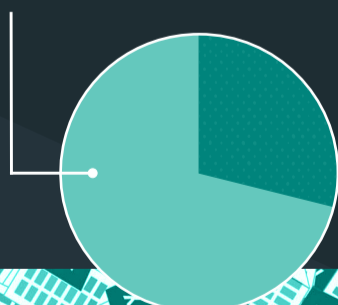

49%

Team collaboration

*Respondents were allowed to select more than one option

NEEDS IMPROVEMENT

71% use Spreadsheets for site portfolio management

47%

report project managers struggle to collaborate with 3rd party systems

Spreadsheets don't breed efficiency or foster collaboration. But Sitetracker does.
